Invoicing, payments and reporting

Turfware

The invoice comes off the order, payments come back on their own, and the numbers are there when you want them.

Month end is where the hours disappear. In Turfware the invoice is generated from the order, sent through Sawfish, and synced to MYOB or Xero. Payments flow back to the order, and every sale is in one system to report on.

The invoice as your customer sees it: turf, slabs and pallets, freight, and every way to pay.

Invoicing

Generate from the order

Pick the invoice date. The due date fills in from the customer's terms. Save as a draft, approve it, or approve and send it now.

Your Sawfish templates

Choose the invoice layout. The same choice is offered on quotes, so the quote and the invoice match.

Every invoice on the order

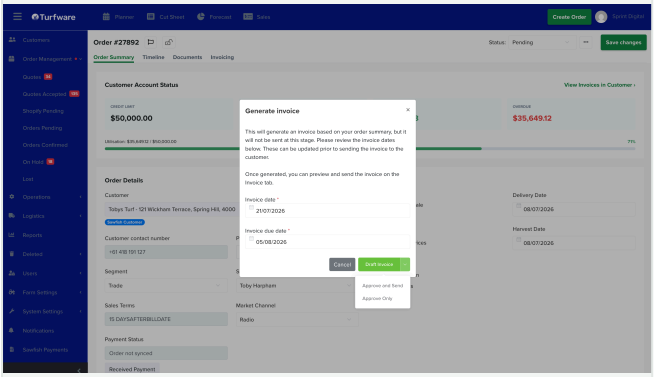

The Invoicing tab lists each invoice with its Sawfish status, amount paid and amount due.

Sawfish, free alongside Turfware

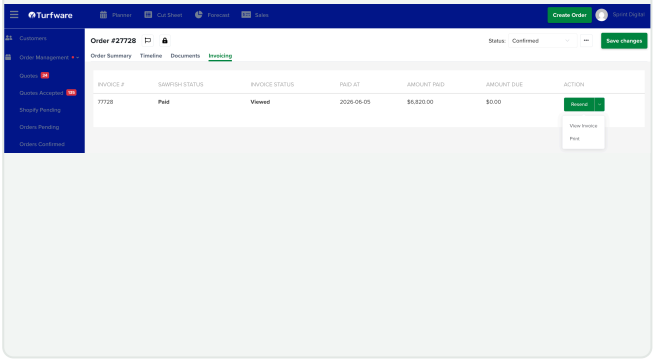

Sawfish is an Australian invoicing and payments platform. It's free to use with Turfware; only its transaction fees apply.

Payments and your accounts

1. Customers pay by card, PayTo, PayID, Tap to Pay, Apple Pay or Google Pay through Sawfish.
2. A payment in Sawfish shows on the Turfware order within about a minute.
3. Sawfish syncs invoices and payments with MYOB or Xero about every 15 minutes.
4. Cash or bank transfer? Record it on the order with Received Payment.

Generate invoice: date, due date, and draft or send.

The order's Invoicing tab.

What it costs

- From $500 + GST a month: three users and 250 texts included, $75 + GST for each extra person, and never more than $1,000 + GST a month for users.
- No setup fee. We set it up with you, around how your farm runs.
- If you don't like it after the first month, you don't pay. If you do, we keep going.
- Reports for sales, installation, preparation and logistics, all exportable to Excel.
